Legion: Health-tech website

Project documentation for the Afro-Asian Forum for Innovation and Technology (AFFIAT), Aswan Finals 2026.

Students: Malek Mohammed, Omar Mofreh

1. What is Legion? | ما هو المشروع؟

Legion is a website for a made-up health-tech company. Visitors can read about the platform, try a demo chat with an AI care agent, send a message, and open sign-in and register forms.

- **Who it is for:** Patients who track their health, and the doctors and care teams who look after them.
- **Live site:** https://omar-mofreh.github.io/legion/

2. The Problem | المشكلة

Health data is spread across apps, devices and paper records. Patients cannot see the whole picture, and doctors start visits without context. Legion shows everything in one calm place.

3. How it is built | كيف بُني

Part	What it does
HTML	Six pages, each in its own `.html` file
CSS	One file, `styles.css`, with all the colours and layout
JavaScript	One file, `script.js`: the phone menu, the Show/Hide password button and the form messages
Google Fonts	DM Sans and Space Grotesk

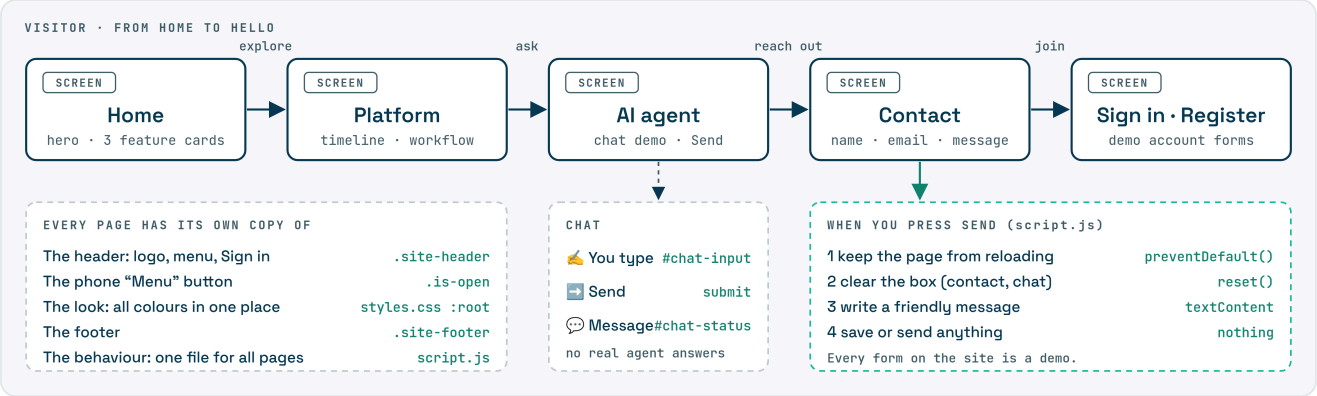

There is nothing to install: no framework, no database and no server code.

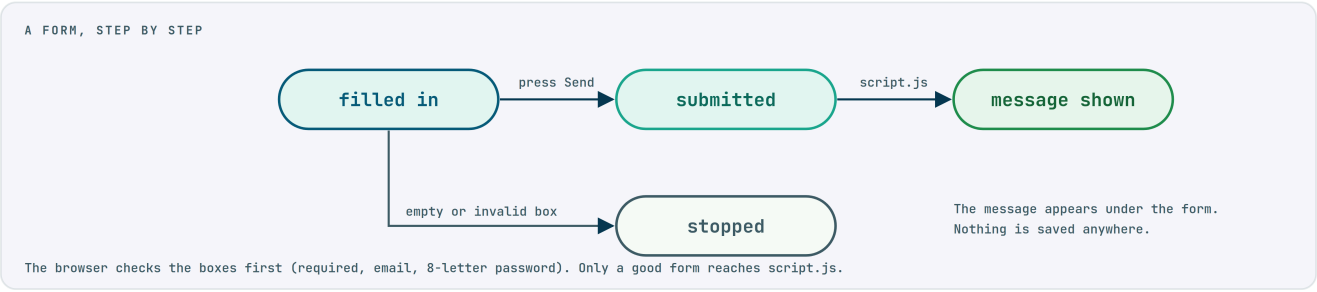

```
legion/
├── index.html        # Home
├── platform.html     # Platform
├── ai-agent.html     # AI care agent chat demo
├── contact.html      # Contact form
├── login.html        # Sign in
├── register.html     # Create account
├── styles.css        # All the styling
├── script.js         # All the behaviour
└── docs/             # This documentation, the poster and the slides
```

4. Features | المميزات

Page	What you can do
Home	See a sample health dashboard (pulse, oxygen, steps, sleep) and the three steps.
Platform	Read how Legion works and see the care network.
AI agent	Type a message in a demo chat.
Contact	Send your name, email and message.
Sign in / Register	Fill in the forms, with a Show/Hide password button.

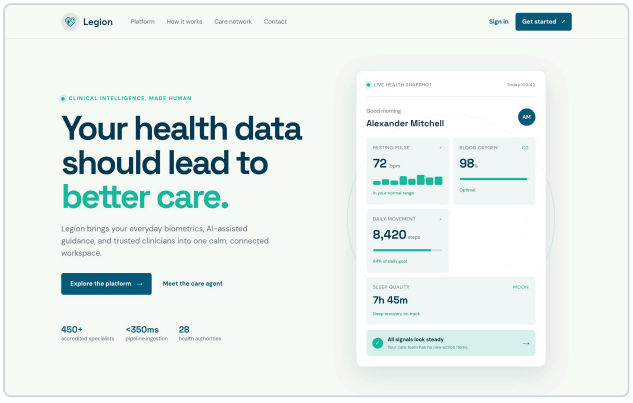

On a phone, the links hide behind a ”Menu” button.

Try the site: https://omar-mofreh.github.io/legion/

Design: deep blue `#075A78`, mint `#19B99D` and a soft cream background `#F7FAF7`. The logo is a heart made of lines, with a plus sign and a heartbeat.

6. Limits | حدود المشروع

This is a school demo, kept simple on purpose:

- The forms save nothing and send nothing.
- The AI care agent is not real.
- The health numbers are made-up examples.

7. What We Learned | ماذا تعلمنا

1. Building pages with a header, main content and footer.
2. Making the layout fit tablets and phones.
3. Writing one small script that shows a friendly message when a form is sent.
4. **Hardest part:** making the layout work on phones.
5. **Most fun part:** building the sample health dashboard.
6. **Next step:** connect the forms to a real service.
